

# **Automotive fluid handling solutions from start to finish**

From metal sheet to finished car, fluid handling plays an important role in the automotive production process. Whether it's fluid transfer, lubrication, bonding, sealing or painting; Graco has a solution that will fit your needs

# Why partner with Graco?

- Years of expertise in creating high quality products for fluid handling applications, including a wide range of ATEX-approved equipment
- Constantly investing in innovative equipment to boost your production and reduce your energy consumption
- · A global presence with local experts that can provide swift and detailed service and support

Overview | 2

# 1. Press shop

# Automatic lubrication

With a Graco automatic lubrication system, maintenance of your equipment is easy. A central pump is located at a convenient, accessible location and delivers lubricants in small metered amounts to ensure your machinery is lubricated when it's needed most — while it's working.

P. 6-7

Press shop | 4

# **Automatic Iubrication**

## **EASY MAINTENANCE WITH AUTOMATIC LUBRICATION**

Automatic lubrication results in:

# **Main components for automatic lubrication**

- 1. Pump and Reservoir: stores and provides the lubricant to the system.
- 2. Dividers: dispenses the right amount of lubricant to the application points.

# INJECTOR BASED SYSTEMS

### **Pumps**

# **Lube Pro Series**

Self-venting pneumatic lubrication pumps where high output and fast lube cycle rates are required.

- High-strength, shatter resistant reservoir
- Easy to install No external vent valve or pressure switch needed
- Easy installed into existing air line
- Pressure ratio up to 26:1

# **Injectors**

# **GL-Series**

High performance grease injectors for automatic machine lubrication.

- Accurate, reliable and adjustable lubrication for each lube point
- Long life seal technology to keep your machine running longer
- Large selection available in carbon or stainless steel
- Easy to design, set up and operate
- Flexible to use easily add or subtract injectors for any lube system

## **Controllers**

# GLC 2200/4400

External multi-purpose controller for maximum precision & productivity.

- Customise your lubrication time, pressure, cycle counts and machine counts for maximum control
- Special operation modes save setup and inspection time
- Rugged and weatherproof, meeting stringent IP 69K protection requirements

# **INCREASE**

- Productivity
- Reliability
- AvailabilitySafety
- Durability

# **DECREASE**

- Heat generation
- Wear and noise
- Downtime and operating costs
- Product contamination and corrosion
- Maintenance
- Lubricant consumption

# **Pumps**

# **G-Series**

Versatile Design Helps Solve Today's Automatic Lubrication Challenges.

- Corrosion-resistant, tested and certified for IP69K to perform in the harshest environments
- Wide range of options to meet your desired lubrication solution (reservoir size, motor & control options)
- Optional Data Management System to track the events of the pump, to identify and proof incorrect handling
- Rugged, cost-effective pump for easy lube system set-up, operation and troubleshooting

## **Dividers**

# Modular Series Progressive Dividers

Keeps machines running at peak performance.

- Minimise labour cost & maximize your uptime with the quick change valve sections
- Can be easily accessorised with magnetic and electronic proximity switch cycle indicators to provide optimal precision feedback & monitoring

## **Controllers**

# GLC 2200/4400

External multi-purpose controller for maximum precision & productivity.

- Customise your lubrication time, pressure, cycle counts and machine counts for maximum control
- Special operation modes save setup and inspection time
- Rugged and weatherproof, meeting stringent IP 69K protection requirements

ride should be.

# **Bonding and Anti-flutter**

# **1K MATERIAL SUPPLY**

# **Ambient**

# **Pneumatic supply** system

The Graco supply systems are suitable for booster and pumping applications for a wide range of ambient materials.

- Stainless or carbon steel options
- 2-ball or priming piston lower pumps
- Maximum working pressure: 510 bar
- Maximum flow: 60 liters/min
- Improved serviceability with fewer parts, faster repairs, an lower ownership costs
- Max. Life option available for abrasive materials and prolonged life
- Optional DataTrak records material usage and flow
- Choice of drum sizes up to 200L

# **Electric supply** system

The electric supply system offers the same reliability, combined with better control and significant energy savings.

- Stainless or carbon steel options
- 2-ball or priming piston lower pumps
- Maximum working pressure: 510 bar
- Maximum flow: 19 liters/min
- Improved serviceability with fewer parts, faster repairs, an lower ownership costs
- Max. Life option available for abrasive materials and prolonged life
- Optional DataTrak records material usage
- Choice of drum sizes up to 200L

# **Material up to 70°C**

# Warm melt

The Warm Melt Supply System ensures consistent processes with accurate temperature control.

- Choice of drum sizes up to 200L
- Intuitive, easy-to-use interface
- Configurable to fit your application Up to 6 heat zones
- Modular approach provides easy plug-in installation

# Hot Melt Material up to 204°C

# Therm-o-Flo®

The Therm-O-Flo is a hot melt system which has advanced temperature control capability, that virtually eliminates overheated material and reduces material degradation.

- Choice of drum sizes up to 200L Continuous flow rate up to 5kg/min
- Up to 14 heat zones
- Modular approach provides easy plug-in control
- Stores historical data for all jobs

# **1K METERING**

# **Dosing and Flow Control**

# **PCF**

The PCF is a metering system that dispenses a precise, continuous flow of single component sealants or adhesives. It can be used in conjunction with a material supply system and robotics platform.

- Automatically adjusts to compensate changes in material temperature/viscosity
- Adjusts dispense rate according to robot speed
- Continuous flow: From 6cc to 22500 cc/min Available for PROFIBUS, PROFINET,
- Devicenet, EtherNet/IP and Discrete I/O
- Stores historical data for all jobs

# 2K METERING & DISPENSE

# **Fixed Ratio**

# HFR™

The HFR is a fixed ratio system that can meter and mix low to high viscosity materials for on-ratio dispensing.

- Mixing ratio from 1:1 to 32:1
- Offers continuous flow for bead shot, pour and spray applications (manual or automatic)
- A range of material supply options available for tanks and drums, including agitation
- Available for ambient or heated dispense applications
- Interchangeable pumps can accomodate future ratio changes
- Stores historical data for all jobs

  Devicenet, EtherNet/IP and Discrete I/O
- Stores historical data for all jobs

# **2K METERING AND DISPENSE**

## **Fixed Ratio**

# HFR™ - NVH

The HFR-NVH is a fixed ratio system for heated NVH acoustic foam that accurately mixes and dispenses for manual and automatic applications.

- Pre-conditioned (heated) material supply tanks
- Interchangeable pumps can accomodate future ratio changes
- Stores historical data for all iobs

# **Pretreatment / Cathodic electro-coating**

## **AIR-OPERATED**

# **Double Diaphragm Pump**

# Husky™

Husky is an air-operated double diaphragm pump, ideal for fluid transfer applications, commonly used for tank and drum refilling.

- Max output: 1135 lpm
- Pressure Ratio 1:1 or 2:1
- Low air consumption
- Longer-lasting diaphragms
- Option to add DataTrak

# **Piston/Barrel Pump or Drum**

# T1, T2 and Monarch

A complete range of air-operated drum transfer pumps for 20-200 liter drums.

- High flow, low pressure applications
- Pressure ratio from 1:1 to 5:1
- Suction lance or direct drum fitting
- Carbon or stainless steel range

### **ELECTRIC**

# **Double Diaphragm Pump**

# **Husky<sup>™</sup> E-Series**

The Husky e-series is an electric double diaphragm pump that combines all the benefits of a pneumatic double diaphragm pump while helping you reduce your energy consumption. Commonly used for tank and drum refilling.

- Max output: 150 lpm
- Pressure ratio: 1:1
- Can stall under pressure without additional pressure valves
- Metering and batching at 1% accuracy
- Can run dry
- Self-Priming

# **Peristaltic Pump**

# **SoloTech**

The Solotech electric perastaltic pump range can handle a variety of chemicals.

- Output ranges up to 60 lpm
- Pressure range up to 8,6 bar
- 4 hose types available to handle most common chemicals
- Single roller 360 degree rotation gives high displacement per/revolution
- Lower operational speed = less wear/ lower maintenance
- 3 gearbox/motor speed choices to suit your application
- VFD (Variable Frequency Drive) options available (AC Motor)
- DC version uses 1 gearbox
- Can stall under pressure

Body in white | 12

# 3. Paint shop

Spray booth - 2K mixing

With the automotive industry moving towards higher

performance coatings, there is a growing need to mix and spray 2k primers, base and clear coats

Graco offers a range of 2 & 3K mixing equipment,

complemented by a professional range of air and

and spraying

electrostatic spray guns.

accurately.

Graco can pump meter and apply water and solvent based protective wax coatings from low to high viscosity with even abrasive properties.

P. 24-25

The heart of every paint shop is the mixing room and its paint supply systems having the ability to deliver correct volume/pressure paint to the spray booths.

P. 20-21

# **Spray guns**

With a wide choice of applicators, Graco is offering spray guns for all types of installation, both for spray booths equipped with automatic robots and for manual painting. Improve your productivity and quality with our range of electrostatic guns.

P. 23

# **Sealing, Sound deadening and NVH**

Water ingression, corrosion protection and sound-deadening NVH need an optimised and repeatable process within the paint shop. Graco has a range of sealer pumps, metering systems and applicators for manual and automatic processes, whatever size of material delivery containers you may have.

P. 16-17

**Anti-chip** 

Special coatings for stonechip (anti-chip) protection on the vehicle in 'high risk' areas of the body often need local low-volume paint supply systems, sometimes only feeding 1 or 2 spray stations.

P. 18-19

P. 22

Paint shop | 14

Paint shop | 15

# **Sealing, Sound deadening and NVH**

# **1K MATERIAL SUPPLY**

# **Medium to High Pressure**

# Pneumatic supply system

The Graco supply systems are suitable for booster and pumping applications for a wide range of ambient materials.

- Stainless or carbon steel options
- 2-ball or priming piston lower pumps
- Maximum working pressure: 510 bar
- Maximum flow: 60 liters/min
- Improved serviceability with fewer parts, faster repairs, and lower ownership costs
- Max. Life option available for abrasive materials and prolonged life
- Optional DataTrak records material usage and flow
- Choice of drum sizes up to 200L

# Electric supply system

The electric supply system offers the same reliability, combined with better control and significant energy savings.

- Stainless or carbon steel options
- 2-ball or priming piston lower pumps
- Maximum working pressure: 510 bar
- Maximum flow: 19 liters/min
- Improved serviceability with fewer parts, faster repairs, and lower ownership costs
- Max. Life option available for abrasive materials and prolonged life
- Optional DataTrak records material usage
- Choice of drum sizes up to 200L

## **TOTE MATERIAL SUPPLY**

# **Bulk/ Low Pressure**

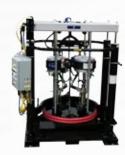

# Husky<sup>™</sup> Diaphragm Pump

The Husky is available in 2 inch and 3 inch diaphragm pumps for unloading road delivery tankers, transferring from tank to tank, and priming high pressured supply pumps.

- Excellent self-priming capability
- High volume flow rates
  (Max. output 1135 liters/minute)
- Available in many materials like polypropylene, stainless steel, PVDF or

## **TOTE MATERIAL SUPPLY**

# **Medium to High Pressure**

# **Uni-Drum**

Uni-Drum is used for pumping medium to high viscosity sealants from 1000L or 1200L Totes.

- Uses 4 pneumatic cylinders to achieve smooth operation and to prevent jamming
   Improved material savings
- Available with single or twin supply pumps
- Can be used as stand alone or tandem
- Compatible with both pneumatic and electric supply pumps

## **1K METERING**

# **Dosing and Flow Control**

# **PCF**

The PCF is a metering system that dispenses a precise, continuous flow of single component sealants or adhesives. It can be used in conjunction with a material supply system and robotics platform.

- Automatically adjusts to compensate changes in material temperature/viscosity
- Adjusts dispense rate according to robot speed
- Continuous flow: From 6cc to 22500 cc/min
  Available for PROFIBUS, PROFINET,
- Devicenet, EtherNet/IP and Discrete I/O
- Stores historical data for all jobs

# **2K METERING AND DISPENSE**

# **Fixed Ratio**

# HFR™ - NVH

The HFR-NVH is a fixed ratio system for heated NVH acoustic foam that accurately mixes and dispenses for manual and automatic applications.

- Pre-conditioned (heated) material supply tanks
- Interchangeable pumps can accomodate future ratio changes
- Stores historical data for all jobs

Paint shop | 16

# **Anti-chip**

# **PAINT SUPPLY**

# **Single Spray Station**

# **Pressure Pot**

Suitable for local supply to individual spray stations.

- Max working pressure 7 bar
- Available from 7 19 liters capacity
- Available for single or twin gun supply
   Ideal for low volume, low pressure supply system
- Accurate pressure control at low pressures
- Pulse-free fluid delivery
- Aluminum or stainless steel design
- Available with fluid regulators and agitators

# **Local Circulation**

# Merkur™

Piston pump with long-lasting durability. Suitable for local supply of multiple spray stations.

- Max output @ 60 cpm: 9 lpm
- Pressure Ratio: 10:1 48:1
- Delivers a consistent, high quality finish
- Easy to flush
- Sprays a wide variety of material viscosities

# MANUAL SPRAY

# **Air-Spray Gun**

# AirPro™

The AirPro air spray gun delivers exceptional spray performance while addressing your environmental and operator concerns.

- Compliant atomization
- Even material distribution through the spray pattern for optimum coverage
   Improved transfer efficiency and uniform
- air flow through reduced air consumption
- Enhanced atomization through materialspecific aircaps

Paint shop | 18
Paint shop | 19

# **Paint supply and Circulation pumps**

### **PAINT TRANSFER**

# Air-Operated

# Husky™

Husky is an air operated double diaphragm pump, ideal for fluid transfer applications, commonly used for tank and drum refilling.

- Max output: 1135 lpm
- Pressure Ratio 1:1
- Low air consumption
- Superior diaphragms lifetime
- Option to add DataTrak

## **Electric**

# **Husky<sup>™</sup> E-Series**

The Husky e-series is an electric double diaphragm pump that combines all the benefits of a pneumatic double diaphragm pump while helping you reduce your energy consumption. Commonly used for tank and drum refilling

- Max output: 150 lpm
- Pressure ratio: 1:1
- Can stall under pressure without additional pressure valves
- Metering and batching at 1% accuracy
- Can run dry
- Self-Priming
- ATEX-version available

# **PAINT SUPPLY**

# **Air-Operated**

Diaphragm supply pump with low pulsation and low shear. This makes the pump ideal for low-pressure spray applications that require a perfect finish.

- Max output: 32 lpm
- Pressure ratio: 1:1
- Saves material and time during flushing, priming and colour changes
- Pumps a wide variety of material viscosities

## PAINT TRANSFER/SUPPLY

# **Air-Operated**

# **Endura-Flo™**

Medium to high pressure diaphragm pumps with low pulsation and low shear used on small paint supply or circulation systems. Can be used for piggable systems.

- Max output: 7 lpm
- Pressure ratio: 4:1
- Direct access to critical components for easy maintenance and fast repair
- Durable and easy to flush diaphragm
- Soft start for piggable systems
- Mountable 360°
- Upgradable with DataTrak

## PAINT SUPPLY AND CIRCULATIONS

# Air-Operated

# E-Flo™ DC

- Max output: 40lpm
- Maximum working pressure: 27 bar
- Pressure or flow control
- Stalls under pressure

- Quiet electric motor
- Plug & play (no VFD)
- 2-ball lower for paint supply applications
- 4-ball lower for paint circulation applications
- Sealed 4-ball lower available for abrasive materials
- Low maintenance
- Compact footprint

# **Air-Operated**

# President

Medium flow piston pump used in small paint circulation systems.

- Max output: 13 lpm
- Pressure ratio: 3:1 30:1
- Reliable low maintenance air motor
   Positive displacement, 2-ball design will provide a uniform and easily controlled delivery
- Low shear

# High-Flo™

High flow piston pump for main paint circulating systems.

- Max output: 80 lpm
- Max pressure ratio: 6:1
- Rugged body armor, built to handle the toughest applications
- Modular design for easier maintenance
- Integrated air control
- Optional DataTrak

# Hydraulic

# Viscount™

High flow hydraulic piston pump for main paint circulating systems.

- Max output 80 lpm
- Max working pressure: 32 bar
- Low operating cost
- No icing
- Field proven pump that will provide a reliable performance

Paint shop | 20

# **Spray booth - 2K mixing and spraying**

# **UP TO 3 COLOURS**

# **Easy**

# ProMix<sup>™</sup> 2KE

An easy-to-use mixing and dosing unit for up to 3 colours and 1 catalyst.

- Easy-to-use, compact entry-level proportioner
- Meter and pump version
- USB reporting

# **UP TO 30 COLOURS**

# **Advanced**

# ProMix™ 2KS/3KS

The 2KS/3KS can handle up to 30 colours, 4 catalysts and provides advanced reporting capabilities.

- Sequential and dynamic dosing
- Upgradable to 3K Modular design
- Flow control

# **Expert**

# **ProMix<sup>™</sup> PD2K**

When frequent daily colour changes occur or when working with short pot life materials.

- Mix close to the gun reduces solvent usage up to 80%
- Instant colour change
- Up to 30 colours and 4 catalysts with 2 or 4 dosing pumps
- Modular design
- Pressure or Flow control

# **Spray guns**

## **MANUAL GUNS**

# **Air-Spray**

# AirPro™

The AirPro air spray gun delivers exceptional spray performance while addressing your environmental and operator concerns.

- Compliant atomization
- Even material distribution through
- the spray pattern for optimum coverage Improved transfer efficiency and uniform air flow through reduced air consumption
- Enhanced atomization through materialspecific aircaps

# **Electrostatic**

# Pro Xp™

The electrostatic air spray gun that delivers an excellent transfer efficiency and finish quality.

- Powerful, small and light
- Internal power supply, so no heavy cords
- Easy integration in your spraybooth
- Choose between Standard, High Conductivity and kV Booster
- Available with Smart Controls

# **AUTOMATIC GUNS**

# **Air-Spray**

# AirPro<sup>™</sup> Auto

An automatic applicator that is lightweight, compact, and will provide a consistent spray pattern for a high quality finish.

- Models available with a fluid control knob
- Stainless steel construction handles the toughest coatings, from acid to waterborne
- Indexing aircap provides fast and accurate positioning in either the vertical or horizontal position
- Lightweight and compact rounded gun

## **Electrostatic**

# **Pro Xpc™ Auto**

A compact and lightweight automatic electrostatic air spray gun. Ideal for small spaces and robots/fixtures with lower payloads.

- Designed for efficient system integration
- System integration with manifold options to mount to a robot, reciprocator or fixed
- PLC Integration possible

# 2K METERING & DISPENSE

## **Fixed Ratio**

# HFR™

The HFR is a fixed ratio system that can meter and mix low to high viscosity materials for on-ratio dispensing.

- Mixing ratio from 1:1 to 32:1
- Offers continuous flow for bead shot, pour and spray applications (manual or automatic)
- A range of material supply options available for tanks and drums, including agitation
- Available for ambient or heated dispense applications
- Interchangeable pumps can accomodate future ratio changes
- Stores historical data for all jobs

# **Oil dispense solutions**

# **OIL DISPENSE**

# **Pumps**

# Fire-Ball™

Air-powered piston pumps designed for medium volume, high pressure oil and grease transfer.

- High quality, corrosion-resistant design
- Available in 5:1 for oil and 15:1 & 50:1 for grease
- Handles up to 11lpm
- Unmatched reliability and durability
- Few moving parts translates into low maintenance and low cost of ownership
- Category leading 7-year warranty

# **Control Valves and Meters**

# **Standard Duty Series**

Manual & preset dispense meters designed for dispensing motor oils, AFT, gear lube and anti-freeze.

- Suitable for both in- and outdoor use
- Multiple extensions available
  103 bar- handles up to 53 lpm
- Familiar locking trigger latch
- 3 default presets available to allow quick dispense of common volumes
- Category leading 5-year warranty

### **Hose Reels**

# **Standard Duty Series**

Professional level hose reels designed for frequent, everyday use in a wide variety of applications.

- Handles hose lengths up to 20m
- Enclosed for safety and protection
- Flexible mounting options: wall or ceiling Compact design fits in small spaces
- Open swivel ports ensure high fluid flow with minimal pressure loss
- Category leading 7-year warranty

## **FLUID MONITORING**

# Total Fluid Management System™

# **Matrix®**

Optimal control over your fluid inventory and service operations to help you reduce costs and increase your profitability.

- Because Matrix is wireless, it's easier, less costly and less labour-intensive to install than wired systems
- Matrix components communicate with each other wirelessly and capture realtime data to make sure fluids are tracked and accounted for
- Easily retrofit and add on to your existing lubrication equipment
- Easily add components as your business grows

Powertrain | 28

# **Automatic lubrication**

## **EASY MAINTENANCE WITH AUTOMATIC LUBRICATION**

Automatic lubrication results in:

# **Main components for automatic lubrication**

- 1. Pump and Reservoir: stores and provides the lubricant to the system.
- 2. Dividers: dispenses the right amount of lubricant to the application points.

# **INJECTOR BASED SYSTEMS**

## **Pumps**

# **Lube Pro Series**

Self-venting pneumatic lubrication pumps, where high output and fast lube cycle rates are required.

- High-strength, shatter resistant reservoir
- Easy to install No external vent valve or pressure switch needed
- Easy installed into existing air line
- Pressure ratio up to 26:1

# **Injectors**

High performance grease injectors for automatic machine lubrication.

- Accurate, reliable and adjustable lubrication for each lube point Long life seal technology to keep your
- machine running longer Large selection available in carbon or
- stainless steel
- Easy to design, set up and operate
- Flexible to use easily add or subtract injectors for any lube system

## **Controllers**

External multi-purpose controller for maximum precision & productivity.

- Special operation modes save setup and inspection time
- Rugged and weatherproof, meeting

# **INCREASE**

- Productivity
- Reliability Availability
- Safety
- Durability

# **DECREASE**

- Heat generation
- Wear and noise
- Downtime and operating costs
- Product contamination and corrosion
- Maintenance
- Lubricant consumption

# **SERIES PROGRESSIVE SYSTEMS**

# **Pumps**

# **G-Series**

Versatile Design Helps Solve Today's Automatic Lubrication Challenges.

- Corrosion resistant, tested and certified for IP69K to perform in the harshest
- Wide range of options to meet your desired lubrication solution (reservoir size, motor & control options)
- Optional Data Management System to track the events of the pump to identify and proof incorrect handling
- Rugged, cost-effective pump for easy lube system set-up, operation and troubleshooting

# **Dividers**

# **Modular Series Progressive Dividers**

Keeps machines running at peak performance.

- Minimise labour cost & maximize your uptime with the quick change valve sections
- Can be easily accessorized with magnetic and electronic proximity switch cycle indicators to provide optimal precision feedback & monitoring

# GLC 2200/4400

- Customise your lubrication time, pressure, cycle counts and machine counts for maximum control
- stringent IP 69K protection requirements

## **Controllers**

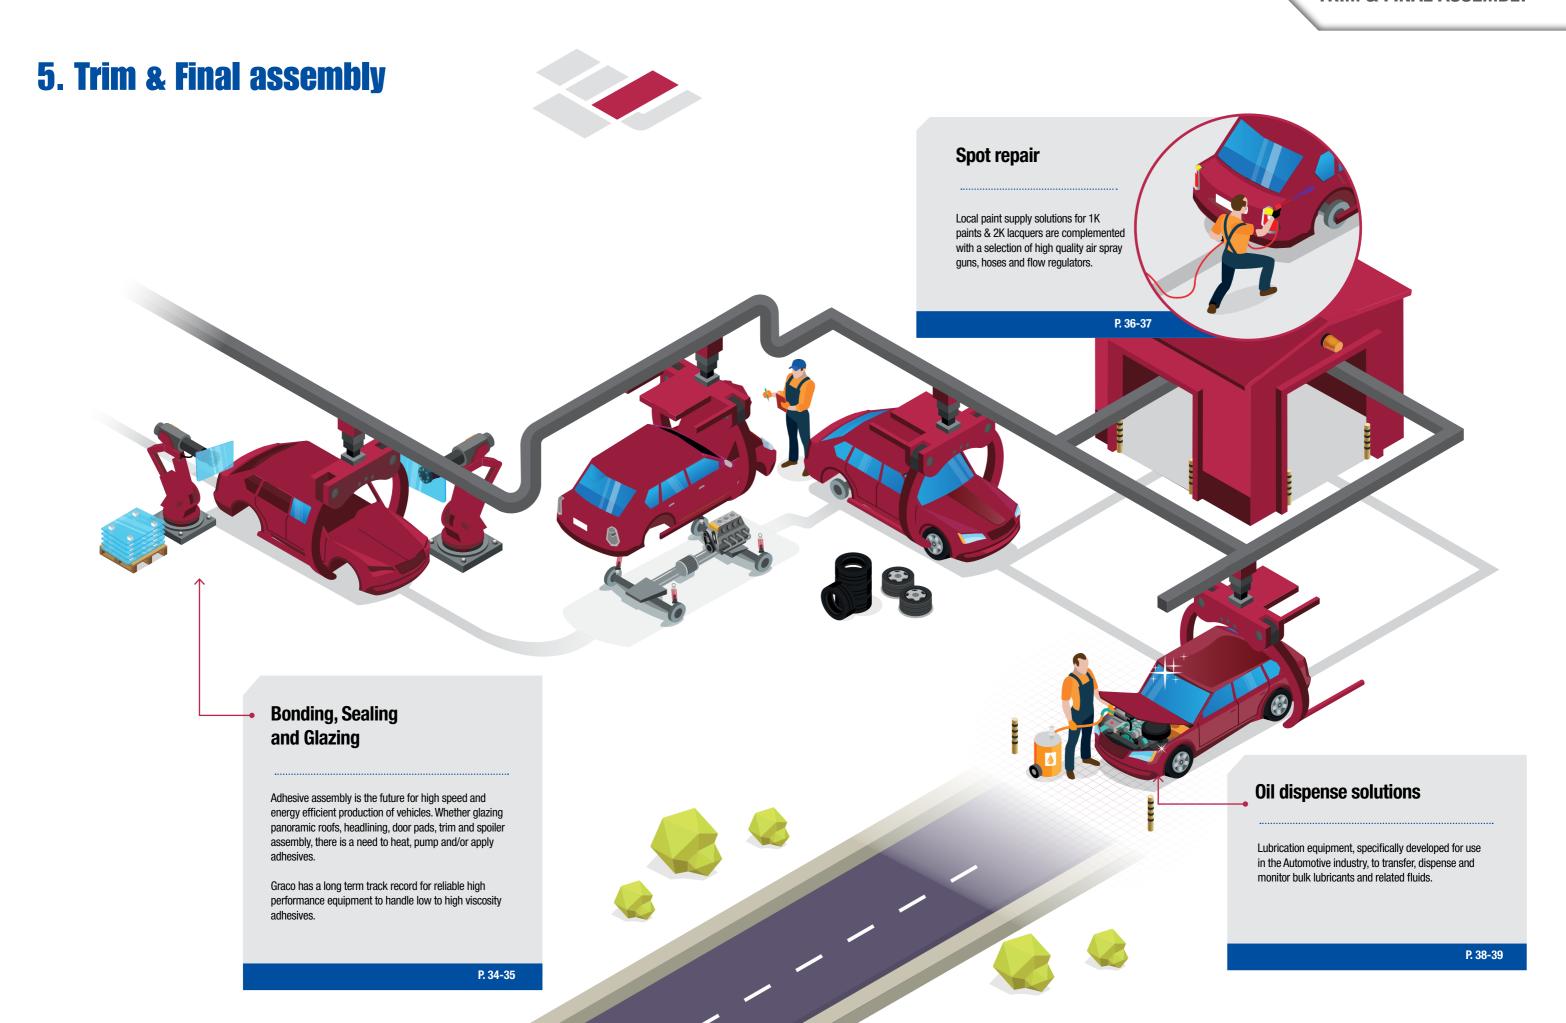

# GLC 2200/4400

External multi-purpose controller for maximum precision & productivity.

- Customise your lubrication time, pressure, cycle counts and machine counts for maximum control
- Special operation modes save setup and inspection time
- Rugged and weatherproof, meeting stringent IP 69K protection requirements

# **Bonding, Sealing and Glazing**

# **1K WAX SUPPLY**

# **Low to Medium Pressure**

# **President**

Suitable for low viscosity materials. Available in 2 or 4-ball options with carbon or stainless steel fluid sections.

- 2-ball pressure ratio of 23:1 & 46:1 (stainless steel)
- 4-ball pressure ratio 5:1 & 10:1 (carbon and stainless steel)
- Ideal for low to medium pressure at low flow rates
- 4-ball design available with open or closed up throat seal design

# **1K MATERIAL SUPPLY**

# **Medium to High Pressure**

# Pneumatic supply system

The Graco supply systems are suitable for booster and pumping applications for a wide range of ambient materials.

- Stainless or carbon steel options
- 2-ball or priming piston lower pumps
- Maximum working pressure: 510 bar
- Maximum flow: 60 liters/min
- Improved serviceability with fewer parts, faster repairs, and lower ownership costs
- Max. Life option available for abrasive materials and prolonged life
- Optional DataTrak records material usage and flow
- Choice of drum sizes up to 200L

# Electric supply system

The electric supply system offers the same reliability combined with better control and significant energy savings.

- Stainless or carbon steel options
- 2-ball or priming piston lower pumps

- Maximum working pressure: 510 bar
- Maximum flow: 19 liters/min
- Improved serviceability with fewer parts, faster repairs, and lower ownership costs
- Max. Life option available for abrasive materials and prolonged life
- Optional DataTrak records material usage and flow
- Choice of drum sizes up to 200L

# Hot Melt Material up to 204°C

# Therm-o-Flo®

The Therm-O-Flo is a hot melt system which has advanced temperature control capability, that virtually eliminates overheated material and reduces material degradation.

- Choice of drum sizes up to 200L
- Continuous flow rate up to 5kg/min
- Up to 14 heat zones
- Modular approach provides easy plug-in control

### **1K METERING**

# **Dosing and Flow Control**

# © PCF

# **PCF**

The PCF is a metering system that dispenses a precise, continuous flow of single component sealants or adhesives. It can be used in conjunction with a material supply system and robotics platform.

- Automatically adjusts to compensate changes in material temperature/viscosity
- Adjusts dispense rate according to robot speed
- Continuous flow: From 6cc to 22500 cc/min
  Available for PROFIBUS, PROFINET,
- Devicenet, EtherNet/IP and Discrete I/O
- Stores historical data for all jobs

# **2K METERING AND DISPENSE**

# **Variable Ratio**

# **Exactablend SB**

The Exactablend SB is a variable ratio system, that provides accurate on-ratio mixing from medium to high viscosity materials.

- Variable ratio from 1:1 to 20:1
- Smooth pump changeover delivers consistent flow
- Mixing at the gun and base purging provides significant material savings

# **Spot repair**

# **PAINT SUPPLY**

# **Single Spray Station**

# **Pressure Pot**

Suitable for local supply to individual spray stations

- Max working pressure 7 bar
- Available from 7 19 liters capacity

  Available for single or twin gun supply
- Ideal for low volume, low pressure supply
- Accurate pressure control at low pressures
- Pulse-free fluid delivery
- Aluminum or stainless steel design
- Available with fluid regulators and agitators

# **Local Circulation**

# Triton™

Diaphragm supply pump with low pulsation and low shear. This makes this pump ideal for low pressure spray applications that require a perfect finish.

- Max fluid flow at 212 cpm: 32 lpm
- Pressure Ratio: 1:1
- Supplies up to 35% extra air flow to the gun for superior atomization
- Saves material and time during flushing, priming and colour changes
- Delivers a consistent spray pattern and uniform film thickness
- Sprays a wide variety of material viscosities

## **MANUAL SPRAY**

# **Air-Spray**

- AirPro™
- The AirPro air spray gun delivers exceptional spray performance while addressing your environmental and operator concerns.
- Compliant atomization
- Even material distribution through the spray pattern for optimum coverage
- Improved transfer efficiency and uniform air flow through reduced air consumption
- Enhanced atomization through materialspecific aircaps

# **UP TO 3 COLOURS**

# Easy

# ProMix<sup>™</sup> 2KE

An easy to use mixing and dosing unit for up to 3 colours and 1 catalyst.

- Easy to use, compact entry-level proportioner
- Meter and pump version
- USB reporting

# **UP TO 30 COLOURS**

# **Advanced**

# •

# ProMix™ 2KS/3KS

The 2KS/3KS can handle up to 30 colours, 4 catalysts and provides advanced reporting capabilities.

- Sequential and dynamic dosing
  Upgradable to 3K
- Modular design
- Flow control

# **Expert**

# **ProMix<sup>™</sup> PD2K**

When frequent daily colour changes occur or when working with short pot life materials.

- Mix close to the gun reduces solvent usage up to 80%
- Instant colour change
- Up to 30 colours and 4 catalysts with 2 or 4 dosing pumps
- Modular design
- Pressure or Flow control

Final assembly | 36

# **Oil dispense solutions**

# **OIL DISPENSE**

# **Pumps**

# ----

# Fire-Ball™

Air-powered piston pumps designed for medium volume, high pressure oil and grease transfer.

- High quality, corrosion-resistant design
- Available in 5:1 for oil and 15:1 & 50:1 for grease
- Handles up to 11lpm
- Unmatched reliability and durability
- Few moving parts translates into low maintenance and low cost of ownership
- Category leading 7-year warranty

# **Control Valves and Meters**

# **Standard Duty Series**

Manual & preset dispense meters designed for dispensing motor oils, AFT, gear lube and anti-freeze.

- Suitable for both in- and outdoor use
- Multiple extensions available
- 103 bar- handles up to 53 lpm
- Familiar locking trigger latch3 default presets available to allow quick
- dispense of common volumes

  Category leading 5-year warranty

# **Hose Reels**

# **Standard Duty Series**

Professional level hose reels designed for frequent, everyday use in a wide variety of applications.

- Handles hose lengths up to 20m
- Enclosed for safety and protection
- Flexible mounting options: wall or ceiling Compact design fits in small spaces
- Open swivel ports ensure high fluid flow with minimal pressure loss
- Category leading 7-year warranty

# **Total Fluid Management System™**

# **Matrix**®

Optimal control over your fluid inventory and service operations to help you reduce costs and increase your profitability.

- Because Matrix is wireless, it's easier, less costly and less labour-intensive to install than wired systems
- Matrix components communicate with each other wirelessly and capture realtime data to make sure fluids are tracked and accounted for
- Easily retrofit and add on to your existing lubrication equipment
- Easily add components as your business grows

# **FLUID MONITORING**

# **Advanced Controls and Integration Possibilities**

# ProDispense™

Electronic preset dispense system for accurate and quick dispensing of preset amounts of fluids.

- Easily connects to PLC and barcode scanners
- Local or integrated control
- Consistent fluid dispense
- Reporting capability tracks volume and usage
- Manual or automatic dispense

Final assembly | 38

# **ABOUT GRACO**

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings. The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
